# **<u>GDC Player Instructions for Google Home "Dim"</u>**

#### Step One: Compose your feature playlist as normal

Add all of the required media (Ads, Trailers, Feature, etc.) to your playlist by selecting it in the left pane and moving it over into your new or existing SPL.

### Step Two: Locate and remove your Mid/Trailer lighting cue from its default position

This cue, which may be have a variety of names such as "Lights Mid", "Trailer Lights", "Credits", etc., is normally placed on a 5- or 10-second black near the very start of the playlist. Select the media to which it is attached and then press "Edit Cue".

## Step 4: Set the timecode for Mid/Trailer lighting cue

In the seconds column, click the up arrow until the timecode says 33 seconds.

Set Metadata Points - Please key in time	e code (max: 00:00:41[17])	Please select automation cue labels:
Time 00:00	00[00]	arker CREDITS
Add Cue	TimeCode	四
Time Cod Automat	Hour Minute	Second Frame
	0 0	
	Goto End	Ok Cancel
Start Cue		Slank time
GDC	ок	Cancel

Then click "OK", followed by "Add Cue" and "OK" again.

Now finish composing the rest of your feature playlist and save your show.
